

AXIAL

Installation Instructions for 2002 - 2018 RAM 1500 LED License Plate Lamps

Contents:

(2) LED License Plate Lamps

Tools Required:

Flat Head Screw Driver

Step 1\\

Begin by removing the metal retaining clip on license plate light. Unplug the harness, and remove the light from the vehicle.

Step 2\\

Insert the new Axial light into the slot, and secure with the factory metal retaining clip.

Step 3\\

Insert the Axial harness into the factory harness. **Note: The metal prongs on the Axial harness may need to be bent opposite direction depending on year of vehicle. Carefully pull them back to match the prong on the socket of the factory connector.

Step 4\\

Test light for proper function.
