REDROCK 4X4

07-18 Silverado / Sierra Tailgate Assist

Contents:
(1) - Shock
(1) - Upper Ball Mount Plate
(1) - Lower Ball Mount Plate
(1) - Nutsert Tool
(1) - M6 x 1.0 x 20mm Bolt
(1) - Torx Wrench

Tools Required:
- Ratchet
- 10mm Wrench
- T-30 Torx bit
- 13mm socket
- Torque Wrench

**Note:
Install on Driver Side only.

Step 2
Install the upper bracket behind the upper lift gate bolt. Reinstall lift gate strap.

Step 4
Place the nutsert assembly in the tail gate, if it is a tight fit gently tap the assembly in with a rubber mallet. Mark the nut for a visual reference when turning. Hold the Allen head bolt steady and turn the nut (9) full rotations. ****Note: Do not turn the Allen bolt. Over-tightening the nutsert will damage it.

Step 1
Remove the lift gate strap and loosen the 13mm lift gate bolt.

Step 3
Assemble the nutsert tool as follows: nutsert, washer, bearing, washer, nut, Allen bolt. Adjust the tool so that there is 3/4" between the flat washer and the head of the Allen bolt.

Step 5
Apply blue thread lock to the threads of the (1) M6 x 1.0 x 20mm bolt, and secure the lower ball mount plate to the tailgate. Torque the bolt to 8ft-lbs.

S111243 / S509046

Step 6
Before installing the shock ensure both of the shock ends are screwed on all the way.

Step 7
Press the shock onto the ball stud mounts.
