

Billet Fuel Door

(2004-2008)

Contents:

(1) - Billet Fuel Door

Tools Required:

(1) - Small Flat Head Screw Driver

2

Align the fuel door tabs to the fuel door hinge and clip the billet fuel door in place.

3

**Maintenance and Care:
Clean with car wash soap. Avoid harsh chemicals as they can damage the finish. Do not wax.

1

Begin by opening the factory fuel door. Gently insert a small flat head screw driver into the retaining tab hole. The screw driver will depress a retaining pin. Then pull the fuel door away from the vehicle.
